

Allow Guests Access To The Internet – Not Your Network

Easy Setup / Easy Support

The first thing your customer will see is a customized Web page asking for a password. Once they enter the Password they are on to the internet. Outsiders not Knowing the password have no access.

With the addition of the Intelligent Router your network is secure from guests and customer who require internet access and from outsiders who do not know the password. You can change the password whenever you deem necessary. The customized web page and easy access gives customers that secure feeling while knowing your company is easy to work with.
